

Non-life insurance commission transparency

As an independent consultancy firm, we would like to provide insight into our costs and what we do for them. To this end, we also make a so-called comparison chart on our website and also share them during our first contact.

On non-life insurance policies, we receive 10% to 20% commission on the insurance premium, depending on the type of insurance. For this purpose, we prepare quotes and analyses, settle claims and protect your legal position therein. We also process all changes and solve administrative and payment problems. When making quotes, we compare between as many insurers as possible, from which we can freely choose. Before the end of the advice, or starting mediation, we share the exact commission that we receive.
